Welcome to RenderCV!

RenderCV is a Typst-based CV framework designed for academics and engineers, with Markdown syntax support.

Each section title is arbitrary. Each section contains a list of entries, and there are 7 different entry types to choose from.

Education

- PhD** **National University of Ireland, Galway**, Earth and Ocean Sciences Dublin, Republic of Ireland
 PhD in Earth and Ocean Sciences at NUI Galway, funded by DIAS as part of the IRETherm project. Research examined the possibility and quantification of a porosity-hosted geothermal reservoir in the Rathlin sedimentary Basin in Northern Ireland by magnetotelluric methods. Doctoral thesis submitted in May 2018, and successfully defended in September 2018.
 Jan 2012 – Sept 2018
- MSc (Honours)** **University of Auckland**, Physics Auckland, New Zealand
 MSc research focused on fault imaging on sedimentary basin margins by application of the magnetotelluric method, particularly by use of the tipper transfer function. The research included primarily practical and computational components, with fieldwork components in both Australia and New Zealand.
 Dec 2010 – Dec 2021

Experience

- Company C**, Summer Intern Livingston, LA, USA
 • Developed deep learning models for the detection of gravitational waves in LIGO data
 • Published 3 peer-reviewed research papers about the project and results
 June 2024 – Sept 2024
- Company B**, Summer Intern Ankara, Türkiye
 • Optimized the production line by 15% by implementing a new scheduling algorithm
 June 2023 – Sept 2023
- Company A**, Summer Intern Istanbul, Türkiye
 • Designed an inventory management web application for a warehouse
 June 2022 – Sept 2022

Projects

- Example Project** May 2024 – present
 A web application for writing essays
 • Launched an iOS app in 09/2024 that currently has 10k+ monthly active users
 • The app is made open-source (3,000+ stars on GitHub)
- Teaching on Udemy** Fall 2023
 • Instructed the "Statistics" course on Udemy (60,000+ students, 200,000+ hours watched)

Skills

Programming: Proficient with Python, R, and Git; good understanding of Web, app development, and DevOps

Mathematics: Strong understanding of differential equations, calculus, and linear algebra

Languages: English (native), French (fluent)

Publications

- Quantitative geothermal interpretation of electrical resistivity models of the Rathlin Basin, Northern Ireland** 2018
R. Delhay, V. Rath, A. Jones, M. Muller, D. Reay
[10.1016/j.geothermics.2018.09.012](https://doi.org/10.1016/j.geothermics.2018.09.012)/[10.1109/TASC.2023.3340648](https://doi.org/10.1109/TASC.2023.3340648) (Geothermics, 77, pp. 175-187)
- Correcting for static shift of magnetotelluric data with airborne electromagnetic measurements: a case study from Rathlin Basin, Northern Ireland.** 2017
R. Delhay, V. Rath, A. Jones, M. Muller, D. Reay
[10.5194/se-8-637-2017](https://doi.org/10.5194/se-8-637-2017) (Solid Earth, 8(3), pp. 637-660)
- PyCurious: A Python module for computing the Curie depth from the magnetic anomaly.** 2019
B. Mather, R. Delhay
[10.21105/joss.01544](https://doi.org/10.21105/joss.01544) (The Journal of Open Source Software, 4(39), 1544.)

Extracurricular Activities

- There are 7 unique entry types in RenderCV: *BulletEntry*, *TextEntry*, *EducationEntry*, *ExperienceEntry*, *NormalEntry*, *PublicationEntry*, and *OneLineEntry*.
- Each entry type has a different structure and layout. This document demonstrates all of them.

Numbered Entries

1. This is a numbered entry.
2. This is another numbered entry.
3. This is the third numbered entry.

Reversed Numbered Entries

3. This is a reversed numbered entry.
2. This is another reversed numbered entry.
1. This is the third reversed numbered entry.
